These rules will come into force on and from the 1st day of May 1890.

J. M. McNEIL, Col., R.E.,
Secretary to the Govt. of Bengal.

1. EVERY application for the survey of a steam-ship shall be made between the hours of 10 A.M. and 5 P.M. on any day except Sundays and Government holidays, on a printed sheet in the Form No. 1 hereto annexed, which will be supplied for this purpose at the Surveyor's office to the Chief Surveyor at the port at which the survey is to be held, and should be made at least three clear days before the day on which it is desired that the survey shall take place.

2. Upon receipt of an application in the prescribed form duly filled in, the Surveyor will fix the date and hour at which the survey shall be commenced, and will forward to the applicant information of the date and hour so fixed, together with a list of the requisite preparations for the survey of the steam-ship. The said information and list shall be in the form No. 2 hereto annexed.

3. Upon due notice or application from the owner or master, surveys shall be made by the Surveyor or Surveyors appointed under the Act on any day in the year, with the exception of Sundays and Government holidays. If circumstances admit, surveys may be made on holidays.

4. In cases where two Surveyors make the survey, the Engineer-Surveyor will survey the engines, boilers, and all the machinery required to be surveyed under the Act; the Shipwright-Surveyor will inspect the hull, equipments and passenger accommodation, measure and determine the number of passengers the vessel is fit to carry, and see that the certificates of the master, mates, and engineers or engine-driver are such as is required by the Act; also that the lights and fog-signals are in accordance with the regulations for the prevention of collisions at sea.

5. The Surveyors' declarations and the certificates of survey shall be made and issued in the forms hereunto annexed and numbered 3 and 4 respectively.

6. Every declaration shall be sent, in accordance with section 12 of the Act, by the owner or master to whom it is given, to the officer appointed under section 12, clause (1) of the Act.

7. The notice to be given under section 13, sub-section (3) of the Act, to the owner or master when a certificate is ready for delivery shall be given in the form No. 5 hereto annexed under the signature of the officer to whom this function has been delegated under section 13, sub-section (4) clause (b) of the Act.

8. If every part of the steam-ship is not ready for survey at the time so appointed, or if the requisite preparations have not been made in accordance with the list forwarded to the applicant under Rule 2, the Surveyor may fix some other convenient time for the survey.

9. If the Surveyor is unavoidably prevented from being present at the time fixed, the earliest possible information shall be sent to the applicant, and some other time, convenient to the applicant and to the Surveyor, shall be fixed for the survey.

10. With a view to obviate inconvenience and delay, owners and masters whose vessels are in dock or undergoing repair should communicate at once with the Surveyors, if their vessels have afterwards to be surveyed.

11. If a Surveyor finds that any defect exists in the hull, machinery or equipments of a steam-ship, he shall, before refusing to give a declaration regarding the ship under section 11 of the Act, address a letter in the Form No. 6 hereto annexed to the owner or master of the steam-ship, pointing out such defect and the repairs, &c., necessary to make good the same and to enable him to grant a declaration.

12. A fee at the following rates shall be payable in respect of surveys:—

STATEMENT OF THE COURSE OF BUSINESS.

HIS HONOUR the President said:—"I hesitated about calling you together before, for, until the Report of the Select Committee on the Calcutta Port Bill was in our hands, I really had nothing to lay before you, and even now the programme of business which I have to ask you to consider is a very short one, and I do not think it ought to detain us over many meetings. The first item in to-day's programme is in connection with the Rules for the conduct of business. You will recollect that on two or three occasions last year we found ourselves inconvenienced by the existing Rules; and, with the assistance of Mr. Reilly, I have gone through them, and I venture now to circulate a paper for your consideration. You have that paper before you, and I do not think I need further revert to the points contained in it. But I propose to ask a Select Committee to consider these amendments, and any others which may occur to them, for improving the working of the Council.

"The next item is an amendment of the Bengal Vaccination Act, 1880, and Act II, 1887. This is a purely formal matter. The rules under which vaccination is now conducted in Calcutta are based upon the Act of 1880, in which the definition of 'Calcutta' is the old definition conterminous with the original jurisdiction of the Calcutta High Court. Since then the boundaries of Calcutta have been extended by the inclusion within it of the Suburbs: it is therefore necessary to alter the definition in accordance with the terms of the new definition in the Calcutta Municipal Consolidation Act, 1888.

"The alterations made in the Calcutta Port Bill, which has been carefully considered by the Select Committee, will be explained to you by the Hon'ble Sir Henry Harrison, the Mover of the Bill, in the motion which he has to make to-day. It is the only Bill before the Council in which it seems to me there will be any room for debate, and I have no doubt it will have your careful consideration."

RULES FOR THE CONDUCT OF BUSINESS.

HIS HONOUR the President moved that a Select Committee, consisting of the Hon'ble Sir Charles Paul, the Hon'ble Messrs. Nolan and Allen, the Hon'ble Sir Henry Harrison, and the Hon'ble Dr. Rash Behary Ghose, be appointed to consider and amend the rules for the conduct of business at the meetings of the Council.

The Motion was put and agreed to.

BENGAL VACCINATION BILL.

The Hon'ble SIR HENRY HARRISON moved for leave to introduce a Bill to amend the Bengal Vaccination Act, 1880, and Act II, 1887. He said:—

"This Bill is a purely formal one. The present Act provides three areas for which different rules may be prescribed, viz., the old Town of Calcutta, the late Municipality of the Suburbs, and the rest of Bengal to which the Act may be extended. But since the passing of the new Municipal Act, the Town of Calcutta, as well as a large portion of the Suburban area, have been placed under the same administration, whilst the rest of the old Suburban area is assimilated with all the other municipalities in Bengal. It is therefore desirable that the definitions in the Vaccination Act should be so altered that instead of three areas, there should be only two, viz., that of the amalgamated Town of Calcutta, and that portion of the Suburbs which was formerly in the Suburban Municipality, but is now split up into separate municipalities, in conjunction with all other portions of the Province to which the Act has been extended, or may from time to time be extended. The Bill seeks to legalize these new definitions."

The Motion was put and agreed to.

CALCUTTA AND SUBURBAN POLICE SUPERANNUATION FUNDS BILL.

The Hon'ble SIR HENRY HARRISON presented the Report of the Select Committee on the Bill to consolidate the Calcutta and the Suburban Police Superannuation Funds. He said:—

"This Bill has been before the Council for some time, and the Select Committee in preparing its report have not found it necessary to make any material changes; the amendments which they have proposed being little else than verbal: therefore it is not necessary for me to detain the Council to explain the report further."

CALCUTTA PORT BILL.

The Hon'ble SIR HENRY HARRISON presented the Report of the Select Committee on the Bill to consolidate and amend the law relating to the Port of Calcutta, and to the appointment of Commissioners for the said Port. He said:—

"This measure has received the best attention of the Select Committee, and they have proposed certain changes which are worthy of attention, although the substance of the measure remains untouched.

"The first important change proposed is to give one additional member to the Bengal Chamber of Commerce, the number of members having been increased from 13 to 15. It was said that the Chamber of Commerce was not sufficiently represented by four members, and that it was desirable that the number should be increased to five, so that the five branches of trade in Calcutta might be represented. This has been included in the Bill as amended by the Select Committee, and at the same time inasmuch as the Corporation of Calcutta would probably elect one native gentleman to represent them, and as the body which represents the commercial interests of the native community would also probably elect one, it was thought unnecessary to retain the provision that two of the members of the Port Commissioners must be natives.

"The next important amendment which the Select Committee have proposed is the introduction of sections regarding the valuation of the Port Trust property for the purposes of municipal assessment. Recently a question arose as to the proper assessment of the Dock property pending the completion of the Docks, and the Port Commissioners thought it right to consult the Hon'ble the Advocate-General as to the valuation proposed. In giving his opinion on the question referred to him, the Hon'ble the Advocate-General drew attention to the fact that the present Calcutta Municipal Act did not contemplate the valuation of property such as the Docks, that it was hardly adapted for that purpose, and that it was very uncertain how the Courts would interpret the law; and he suggested that it would be wise to introduce a short Act for the purpose of deciding this question.

"It was thought by the Select Committee that the amendment and consolidation of the Port Trust Act would afford the best opportunity for doing so, especially as there was a precedent in the case of Bombay, where for many years past the Port Trust Act has contained provisions regulating the valuation of the Port Trust property.

"The Select Committee have accordingly introduced several new sections embodying the proposals which they have to lay before the Council. The most important changes which they have proposed are that the Local Government, in preference to any Court of Law, should be the arbiter between the parties in the case of their not jointly agreeing to a valuation, and that a reduction of 10 per cent. should be allowed on the amount payable by an ordinary owner in consideration of the special circumstances of the Port Trust property, which in many respects entitles it to consideration in respect of municipal rating. The other consideration is that the true profit made by the Port Trust as the owner of property is that which they have to earn in order to pay interest upon the capital sunk in constructing the Docks and other works, and therefore the best and fairest method to follow is to take this interest as being the income earned by the Port Trust as an owner of property, and to treat it in the same way as capital invested in other parts of the town

is treated, viz., to take 5 per cent., which is substantially the interest which the Port Trust is paying, although they are paying various rates of interest, as the annual value upon which the municipal assessment should be fixed.

"In regard to the submission of the annual budget, we have introduced a clause making it obligatory on the Port Commissioners to submit it before the close of the preceding year. This has always been done, but, as a matter of fact, the Bill as it stood, as has been pointed out by the Government of India, did not make it obligatory on the Port Commissioners to do so, and therefore, so far as the law is concerned, this omission has been supplied, and the period within which the Local Government should pass orders on the budget has been extended from two to three months; two months being considered too short a period.

"Then the next section which has attracted attention is section 76 of the Bill (now section 85), regarding the method of dealing with private wharves and jetties outside the limits of the Port which may hereafter be brought within it. In regard to this matter one of our Colleagues has prepared a carefully written minute of dissent which has been concurred in by another Member of the Committee. As that minute explains the matter at issue between us, it is not necessary for me, in presenting this Report, to make any lengthened observations upon it; the dissent being in the hands of the Members.

"Then in sections 92 to 96 we have thought it necessary to increase the powers of the Local Government in dealing with the scale of charges. Hitherto the Lieutenant-Governor had power in the first instance, when a scale of charges was submitted to him, to approve or disapprove, or to modify it; but the scale having been once approved, there might be a difficulty at any future time, if considered advisable, in exercising the power of modifying it. Questions do arise at times, especially such questions as the tramway charges, which affect the public outside very largely, in which charges once sanctioned might at a later period become injudicious; and in order that the Government might have the full right as it were to arbitrate between the Port Trust and other bodies who may be interested, such as Railway companies, the Bill has been so modified as to enable the Local Government at any time to modify any scale of charges and require it to be altered in accordance with the interests of the public at large.

BUSINESS.

"These are the only changes of importance which the Committee has made in the Bill; the others being for the most part alterations which explain themselves."

The Council adjourned to Saturday, the 4th January, 1890.

As that minute explains the matter at issue between us, it is not necessary for me, in presenting this Report, to make any lengthened observations upon it; the dissent being in the hands of the Members.

"Then in sections 92 to 96 we have thought it necessary to increase the powers of the Local Government in dealing with the scale of charges. Hitherto the Lieutenant-Governor had power in the first instance, when a scale of charges was submitted to him, to approve or disapprove, or to modify it; but the scale having been once approved, there might be a difficulty at any future time, if considered advisable, in exercising the power of modifying it. Questions do arise at times, especially such questions as the tramway charges, which affect the public outside very largely, in which charges once sanctioned might at a later period become injudicious; and in order that the Government might have the full right as it were to arbitrate between the Port Trust and other bodies who may be interested, such as Railway companies, the Bill has been so modified as to enable the Local Government at any time to modify any scale of charges and require it to be altered in accordance with the interests of the public at large.

"These are the only changes of importance which the Select Committee has made in the Bill; the others being for the most part verbal alterations or alterations which explain themselves."

The Council adjourned to Saturday, the 4th January, 1890.

BHADOI AND WINTER RICE CROPS IN BENGAL, 1889.

The 31st December, 1889.—The following papers are published for general information.

By order of the Lieutenant-Governor of Bengal,

P. NOLAN,
Secretary to the Govt. of Bengal.

• FORECAST OF THE OUTTURN OF THE WINTER RICE CROP IN
BENGAL, 1889.

1. *Character of rainfall as affecting the crop.*—The distribution of rainfall most favourable to the winter rice crop is when premonitory showers fall in May or early in June. The rain in the end of June and in July should be heavy: then should come an interval of comparatively fair weather, in which weeding operations may be successfully prosecuted. The September rains must be heavy, shading off into fine weather with October showers. On the sufficiency of the September rains, more than of any other month, depends the character of the winter rice crop—the chief harvest in these provinces. In May and the early part of June of the present year, when the paddy lands are usually prepared and sown, there was a general deficiency of rain in Central and in many parts of Eastern Bengal, in all the districts of the Patna Division except Patna and Durbhunga, in Maldah, the Sudder subdivisions of Pooree and Balasore, and in Hazaribagh. It is reported that this deficiency retarded the cultivation of rice land, or prevented the sowing of early varieties of rice in the Cutwa and Culna subdivisions of Burdwan, Midnapore, Hooghly, the Sudder subdivision of Howrah, Baraset and Basirhat subdivisions in the 24-Pergunnahs, the Sudder, Chooandanga and Ranaghat subdivisions in Nuddea, the Sudder and Bongong subdivisions in Jessore, the Sudder and Lalbagh subdivisions in Moorshedabad, Khoolna, Dacca, the Serajgunge subdivision in Pubna, Backergunge, Tipperah and Noakhally; also in the Sudder subdivisions of Balasore and Pooree.

2. In July, August, and the beginning of September, when the seedlings are usually transplanted, and paddy is in full growth, the crop is reported to have been damaged by deficiency of rain in many parts of Central Bengal, and unfortunately many of these places were the same that had been affected by deficiency of rain at sowing time. The tracts specially affected in this way are the Culna and Cutwa subdivisions in Burdwan, the Sudder and Lalbagh subdivisions in Moorshedabad, the Sudder, Chooandanga, and Ranaghat subdivisions in Nuddea, the Bongong and Sudder subdivisions in Jessore. The crop also suffered somewhat from deficiency of rain at this period in Patna, Chumparun, South Bhagulpore, Maldah, and the Sonthal Pergunnahs; in the Sudder subdivision of Balasore, in Hazaribagh, and in the Palamow subdivision of Lohardugga. It suffered, on the other hand, from excess of rain during the same months in Rungpore, Mymensingh, Julpigoree, and North Bhagulpore.

3. The third critical period in the cultivation of paddy extends over the latter part of September and the month of October, when the crop is in flower, and requires showers to enable it to mature. In Central and Eastern Bengal the rainfall was favourable during this period. But want of rain was more or less felt in all the districts of the Patna Division, in Monghyr and South Bhagulpore, in Palamow, Govindpore (Manbhoom), and in Singbhoom. A cyclonic storm swept over the Orissa coast on the 20th November, which was followed by heavy rain in Orissa, rather heavy rain in South-West and East Bengal, and moderate but general rainfall over the remainder of the province. This unusual fall is reported to have caused damage to the rice crop in Pooree, and in the Balasore, Cuttack, and Singbhoom districts, it may be said generally that the unusual rains of November injured the early varieties of rice where they were then ripening, but either did no harm to, or benefited, the later varieties.

4. *Floods.*—Floods caused loss in the Meherpore subdivision in Nuddea; the Sudder, Lalbagh, and Jungipore subdivisions in Moorshedabad, the Gaibanda subdivision in Rungpore, Pubna, the Munshigunge and Manikgunge subdivisions in Dacca, and parts of Furreedpore; also in the Sudder and Dinapore subdivisions in Patna, the Sudder and Hajepore subdivisions in Mozufferpore, the Sewan subdivision in Saran, and the Sudder subdivision of Purneah, and in Pooree. In parts of the Contai subdivision, in Midnapore, some damage was caused by defective drainage.

5. *Insects.*—Damage by insects is reported only from Backergunge.

6. *Distressed areas.*—An 8-anna crop is believed to be sufficient to enable the people to tide over a year of short harvest; the outturn of the current year, as estimated by Collectors, and the estimated outturn of last year in the tracts of seriously deficient harvest, are—

7. It will be observed that the areas of bad harvest in Central Bengal (Burdwan, Hooghly, Nuddea, Jessore, 24-Pergunnahs, and Moorsshedabad) are all situated in a block, in close proximity to one another. In some of them the harvest was short last year, and in none was it what might be called a good one, so that there cannot be large stores of grain in stock; but all these areas enjoy special facilities for importation, and being close to Calcutta and other manufacturing centres, the inhabitants of them are comparatively prosperous. There is reason to believe that the outturn in Cutwa and Culna has been under-estimated. Though there is cause for exercise of vigilance on the part of the local authorities in the subdivisions named above, it may yet be hoped that there will be no actual distress.

8. In most of the chief rice-growing districts an average, and in some more than an average, crop will be reaped. Looking to the vast extent of country under rice in Bengal, aggregating over fifty-two thousand square miles, and to the widely different conditions of soil, some highly and some lowly situated; and having regard to the varying conditions of climate which prevail in different parts of these provinces, it must always be expected that the crop will suffer in some particular tracts, either from deficiency of rainfall on the one hand, or from excess of rain and floods on the other. The present year is not exceptional in this respect. For the province as a whole, it may be said that the rice crop is far better than that of last year, and that on the whole an average, or nearly an average, crop may be expected.

9. In the statements annexed the estimated outturn for each district is given, and a detailed examination of the statistics of rainfall in each district is made with special reference to the reported estimated outturn. These estimates have been prepared by Collectors of districts after consulting zemindars, European residents, and other local reporters. They have not, however, it is necessary to repeat, any pretensions to statistical accuracy.

10. Following the nomenclature prescribed by the Government of India, 20 annas is taken to represent a bumper crop, 16 annas an average, and 12 annas three-fourths of an average crop.

Director of the Dept. of Land Records
and Agriculture, Bengal.

Bardham.	Sudder	1,302	600	440	9 annas	10 annas	<p>REMARKS BY THE AGRICULTURAL DEPARTMENT, BENGAL.</p> <p>Bardham.—In the Sudder sub-division the rainfall was deficient in May, June, and July; it was very abundant in August (the actual rainfall was only 9 inches against the normal fall of 12·4 inches), and this deficiency largely interfered with transplanting operations. In September the rainfall was sufficient and the crops must have tried to complete the transplanting of khar that could not be planted in the preceding month; but unfortunately there followed dry weather in October with a fall of only 1·4 inches against the normal of 5·40 inches. The early varieties of paddy which ripen in November were injured by affected by this drought, and still more so by the unusually plentiful showers which fell in the first and third weeks of November. The late varieties which mature in December must have been affected by insufficiency of rain in October, but the late rains of November instead of being injurious to them, would appear to have been beneficial, and partly counteracted the evil effects of short rain in October. The Collector's return of a panna crop for the Sudder sub-division appears to be justified by a consideration of the statistics of rainfall. In the Cutwa sub-division the rainfall was very deficient in May and in the first half of June, but was normal in the last half of June and in July. It is probable that want of early rain interfered with the preparation of land for broadcasted paddy. The transplanting season (August and September) was characterized by short rains (12·8 inches against the normal fall of 20·8 inches). Thus the season was unfavourable to both broadcasted and transplanted paddy. In October the rainfall was also slightly deficient (2·41 inches against 3·53 inches). The unusually heavy rains of November undoubtedly injured the early varieties which were then ready for the sickle, while they may have benefited the later varieties. The Collector's estimate of 4 annas appears to be unduly low. In the adjoining districts of Nundah and Moishobahad the estimated outturn is nowhere below 8 annas. It is therefore probable that in Cutwa the outturn has been somewhat under-estimated. The actual outturn will probably be 6 to 8 annas. There is cause for exercise of vigilance on part of the authorities in this and the Cutwa sub-division.</p> <p>In the Nundah sub-division the character of the rainfall was analogous to that in the Sudder sub-division, with the exception that it was more deficient in July and August at the time of transplanting than in the former sub-division. In the latter a fall of 7 annas for Cutwa is therefore reasonable.</p> <p>In the Bhogpur sub-division the character of the rainfall has been uniformly favourable. According to August, which had a slightly deficient rainfall. In October the fall was not below 10 inches, and the deficiency cannot have done much harm, as there was sufficient rainfall in September and the paddy had returned to the fields. The recent rains in October and November are also sufficient to have completed the transplanting of khar that could not be planted in the preceding month. Burdwan	Sudder	1,108	777	604	10 annas	10 annas	The rainfall was generally favourable to the rice crop in this district. Though somewhat deficient in August (874 against normal 1377), it was yet sufficient for the transplanting in October. In October the rainfall in the Kamarpore HAT sub-division was less than the normal, being only 874 against 1377; but as there was a heavy rain in September and again in November, the crop did not suffer. An excellent outturn may therefore be expected. Taking 10 annas to represent an average crop, the outturn of this year is estimated at 10 annas.

In August the fall was somewhat below the normal, but yet sufficient. The comparatively short outturn is attributed to the Sudder, Ghatal, and Tumbuk sub-divisions to short rains in May and the early part of June. The Collector estimates the outturn at 10 annas. A more than average crop is expected in the Coastal sub-division, where owing to floods the crop was very deficient during the past three years.

The character of the rainfall appears to have been the same in all three sub-divisions. The Collector estimates the outturn in the Sudder sub-division at 8 annas, while he gives 12 annas for the Kamarpore and Jehanabad sub-divisions respectively, and a deficiency in the estimated outturn of an average crop. The outturn of the difference in the estimated outturn of the various sub-divisions is not apparent. The outturn of the whole district is probably under-estimated.

Nuddea.—The Collector returns an average crop for the Sudder, Chudanga, and Kuchibhat sub-divisions, and a 12-anna crop for the Moherpore and Kuchibhat sub-divisions. The conditions of rainfall in the Sudder and Chudanga sub-divisions were the same as in the other sub-divisions of the district, namely, great deficiency in May and early June at the time of preparing the rice lands, and again in August and September at the time of transplanting. In May there was only a fall of 1.11 inches against 5.24 inches in the Sudder, and 1.31 inches against 7.26 inches in the Chudanga sub-division; and in August and September there were 17.19 inches against 21.39 inches in the Sudder, and 17.21 inches against 21.77 inches in the Chudanga sub-division. The deficiency of rainfall at the critical periods has seriously affected the crop. A estimate of an 8-anna crop in the Sudder sub-division seems to be reasonable, but a slightly higher estimate is likely to be obtained in the Chudanga sub-division.

The statistics of rainfall recorded at Ranabhat Station show some deficiency in May; but since then, there does not appear to have been want of rain. In June, September, and October the rainfall was in excess of the normal. The Collector remarks that the crop was injuriously affected by want of rain at sowing time, and also at the time of transplanting; the rainfall statistics do not bear out the latter statement. If the distribution of rainfall over the sub-division is to be judged by the fall recorded at Ranabhat, the Collector's estimate of 8 annas would appear below the mark; but looking to the reported prospects of the rice-crop in the neighbouring sub-divisions of Calna, the Sudder sub-divisions of Nuddea and Chudanga, a better crop than 8 annas in the Ranabhat sub-division cannot, probably, be looked for.

The distribution of rainfall in the remaining two sub-divisions—Moherpore and Kuchibhat—was favourable to the rice crop except in May when the fall was short of the normal, but the deficiency was made up by ample rain in June. In Kuchibhat there had been deficiency of rain in October, which was compensated for by the showers which fell in the first week of November. The Collector's estimate of 12 annas is fully borne out by the rainfall statistics. In the Moherpore sub-division a full average crop, or at any rate a 12-anna crop, could have been reaped but for damage caused by floods. A ten-anna crop for the Nuddea district as a whole may be accepted. The Collector in a recent telegram estimates the output for the whole district at 8 annas, reducing the previous estimate by two annas.

The conditions of rainfall in the Bongone sub-division were unfavourable to the rice crop. The fall in May was very deficient, being only 1.23 inches against a normal fall of 5.24 inches. It was again very deficient in August and September, being only 16.14 inches against a normal fall of 21.31 inches. Under these circumstances more than a 10-anna crop as estimated by the district officer cannot be looked for.

In the Sudder sub-division the conditions of rainfall were similar to those obtaining in Bongone, but somewhat more favourable. In May there were only 2.14 inches out of a normal fall of 7.23 inches, and in August only 7.17 against 11.76 inches. The Collector's estimate of a 10-anna crop, therefore, seems to be much above the mark; 12-annas seem to be a more reasonable estimate.

In the remaining sub-divisions of Narail, Jhoidah, and Magore, the season proved favourable on the whole, and a full average crop may be expected.

The Collector estimates the rice crop in the Sudder and Lalbagh sub-divisions at 8 annas and 10 annas respectively. He attributes the short crop to want of rain at the sowing and transplanting times (i.e. May and June) and to subsequent damage by floods. There is no doubt that distressing floods caused damage in many parts of these sub-divisions, but the statistics of rainfall do not bear out the statement that there was deficient rain in May and June. At Berhampore 7.74 inches of rain fell in May against the average fall of 4.93 inches, and 10.14 inches fell in June against the average of 9.29 inches. At Lalbagh 5.39 inches in May and 5.78 inches in June were recorded against 4.74 inches and 4.75 inches respectively. The rainfall recorded at Lalbagh in June fell somewhat short of the average, but with the plentiful rain of the preceding month it should have been sufficient for the purpose of cultivation. While the rainfall of May and June appears to have been quite sufficient, the rainfall in August at the time of transplanting the paddy seedlings, and in October, when the paddy was in flower and was in need of moisture, was insufficient in both the Sudder and Lalbagh sub-divisions, as shown by the following figures:—

	August.	October.
Lalbagh	5.30 against 18.71	4.97 against 10.91
Sudder	5.43 against 4.38	1.31 against 5.39

It is not stated whether what was the damage was caused by floods. In the remaining two sub-divisions, the Collector estimates the yield at 12 annas, which may be accepted, seeing that the rainfall was all that could be desired. The first estimate of the rice-crop for the district as a whole was 13 annas; but this has been recently reduced to 12 annas. This may be due to losses caused by the abnormal rains of November, but is not so stated.

The rainfall in May and October was short of the normal of this district, but was yet sufficient. Full average crops are expected in the Sudder and Kurigram sub-divisions. In the Nilphamari sub-division the crop was somewhat damaged by excessive rainfall in June, July, and August, and in the Gaibandha sub-division the overflowing of the Brahmaputra caused some loss to rice growing on char lands.

This improvement is probably due to the rain which fell in November. The rainfall was in excess of the normal in June and July. This, the Deputy Commissioner reports, did good to the paddy crop in two local circles, while it is reported to have produced the opposite result in the Mynaguri circle.

The distribution of rainfall was favourable to the winter rice crop throughout the district. But the Collector's estimate is 3 annas below the average. Among the causes for the deficient return are given want of rain at the time of sowing. This is the case out of the statistics of rain in May and June (the normal rainfall of the district was 816 inches and 212 inches against the actual of 770 inches and 179 inches respectively). There was, however, an excessive fall in April (5'6 inches) and 12'9 inches respectively. These rains, however, interfered with the preparation and sowing of the lands which require to be sown very early in the season. Early rains of the rivers and high floods to some extent injured the crops; the abnormal rains of November also caused damage to the extent of one-anna in each sub-division.

The Collector's first estimate was between 13 and 14 annas for the whole district; his later return gives a 14-anna crop. In submitting his previous estimate, the Collector remarked that the sudden rise of water after sowing caused some damages, which was, however, more than compensated for by the late rains in the beginning of November. Assuming this to have been the case, it is not yet clear why the rice-crop should fall below the average. There was a slight deficiency of rainfall in April and May as compared with the normal falls of those months, which may have caused some injury. The Collector's estimate is probably under the mark.

The rainfall was sufficient and seasonable excepting in May, when it was short of the normal (7'4 inches against 7'9 inches). This deficiency and attacks of insects caused slight injury. The Collector's first return was 14 annas for the whole district; his present return is 14 annas. An average crop may be expected.

Throughout the whole district there was considerable excess of rainfall over the normal in every month between June and October. The excess was specially marked in the Netrokona and the Sudder sub-divisions. To this the Collector attributes the short return (13 annas) in the Netrokona sub-division. In the rest of the district the excess rainfall is not stated to have caused any damage, but considering that rain fell at Mymensingh on 23 days out of 30 in June and on 27 days out of 31 in July, it appears probable that excessive rainfall did damage to the crop.

The Collector's first estimate was 15 annas for the whole district; his subsequent estimate is a 15-anna crop. On the whole an average crop may be expected.

The rainfall was seasonable and sufficient, although somewhat short of the normal in May, July and August. The Collector at first estimated the return at 15 annas, but owing to the abnormal rains of the latter end of November has reduced his estimate to 16 annas. More than an average crop may be expected.

The rainfall closely agreed with the normal in every month excepting May, when it was deficient. To this deficiency the Collector at first attributed loss to the extent of 3 annas, but he has now raised his estimate to 15 annas. A crop above the average may be expected.

The rainfall was good and timely, and a full average crop is expected.

At first the Deputy Commissioner estimated the return at 16 annas, but owing to damage caused by the rains of November has reduced his estimate to 13 annas.
